Product Sheet - Prodiags Automotive Online Training Module

Workshop Safety

The study of occupational safety in the automotive sector is aimed specifically at new car workers and students. Introducing occupational safety to industry-specific objects and special requirements makes studying truly effective and meaningful even if you don't have years of work experience.

- General industry requirements for workshops and staff
- Work position and lifting suitable for the work situation
- Warehouses and washrooms
- Handling of combustible materials and operation in case of fire
- Mechanic's workwear and workstation
- Working with power tools
- Accident site and emergency notification
- Identifying different types of accidents and basics of first aid
- Starting a resuscitation

Language: English

SKU: 020.0090.010.000.EN

LEARNING OUTCOMES

Studying challenges you to consider similar occupational safety issues in your work environment. You can find ways of working, space, or equipment that prevent accidents. You will also learn what kind of first aid you need to be prepared for. Occupational safety and its doctrines should be repeated at least every 5 years.

Certificate

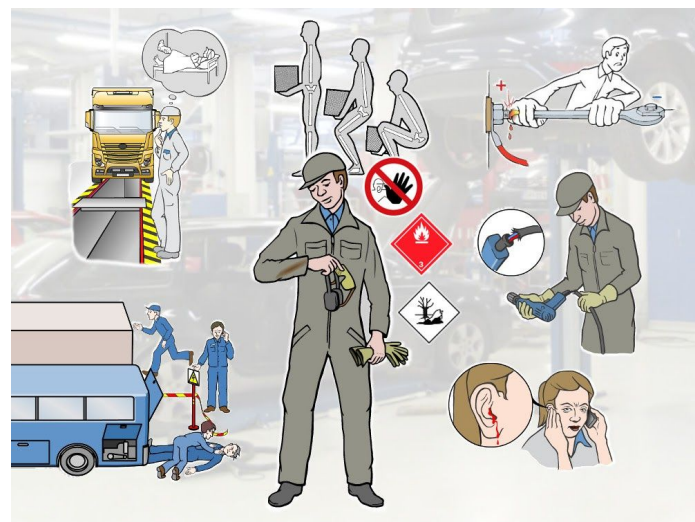

After completing your module of study and approved completion of the exercises, you will be allowed to take the final exam. After completing the final exam, you can print a Prodiags certificate from your attainments register as proof of your expertise.

INTRODUCTION

Why this module?

A car repair shop is a workspace where workers are exposed to many hazards. For this reason, a preventive focus on occupational safety is particularly useful and effectively prevents accidents. Keep in mind that every employee is responsible for their own safety and that of others.

What will you learn?

Studying reminds you to think about things and situations that you can take for granted or not yet thought about. The biggest goal in occupational safety study is to challenge you to focus and reflect on similar situations in your work environment. “How I act or would act in a similar situation?”

If there is no solution in your work environment, please feel free to contact the supervisor or occupational person and ask them for more advice.

You will see how easily small details like; the condition of the tools, the cleanliness of the premises, the working clothes and the working positions help prevent accidents.

PREREQUISITES

No prior knowledge required for taking this module.

System Requirements

Internet connection and PC or laptop with browser.
Recommended screen resolution 1024 x 768 or higher.

Updates

We want to make sure that you always have the latest version of our product. Prodiags reserves the right to make real time updates and changes. This way you'll always have the best version, without extra fees.

Content Equivalence

This modules topics and objectives correspond in scope to a conventional 1 day training event.

Once you have made your payment, you get immediate access to the content. You'll save time and money by not needing to travel.
